SUMMARY

Final-year Software Engineering student passionate about building responsive, component-driven applications. Skilled in React, Vue and modern CSS. Eager to contribute to innovative web projects in a collaborative team.

PROJECTS

- **Mielle - Photography Studio Web Application (React)**
  - Created an interactive web application for a photography studio featuring portfolio viewing, a contact form, and a gallery.
  - Utilized React.js for dynamic content rendering and the development of a responsive user interface.
  - Implemented optimized routing and navigation using React Router.
- **EllsSpells - Beauty and Health Forum (Laravel)**
  - Created a forum platform for the beauty and health community, featuring options for topic posting, commenting, and user authentication.
  - Backend development utilizing the Laravel framework and MySQL database.
  - Incorporates content moderation and a mechanism for reporting user posts.
- **Voyages - Fullstack Web Application (React, .NET, SSMS)**
  - Created a social network for monitoring journeys, exchanging experiences, and discovering destinations.
  - Frontend utilizing React.js to create a dynamic and responsive interface.
  - Backend developed in .NET Core, utilizing a SQL Server database.
  - Implemented features including authentication, profile creation, and the establishment of a "travel diary."
- **Maison Unique - Furniture Retailer (HTML, CSS, JavaScript)**
  Developed a static website for online furniture sales utilizing HTML, CSS, and a minimal amount of JavaScript for interactive features.
  - Emphasize responsive design and mobile optimization.
  - Incorporated fundamental interactivity via basic JavaScript functionality (product categories, filters).

COMPETITIONS

3rd place – Hackathon, DUNP (2024)

Contributed to the development of a web application for an elementary school as part of a team of four members.
Utilized React, Vue, Python, and .NET to develop the solution.
Contributed to frontend design and API integration.
Presented the project to a panel of experts.

EDUCATION

2021- present
STATE UNIVERSITY OF NOVI PAZAR
- **Study Program**: Software Engineering
- **Relevant courses**: Web Development, Algorithms and Data Structures, Database Management, UX/UI Design, Software Project Management (Kanban, Agile Methodologies)

SKILLS

- Technical competencies:
  - Frontend: HTML, CSS, JavaScript, React, Vue.js, TypeScript, PHP, Laravel
  - Backend Fundamentals: ASP.NET, Node.js, Python
  - Dev Tools: Git, Docker, Figma, Postman, Canva
- Interpersonal skills:
  - Flexibility
  - Communication
  - Organization
  - Analytical thinking
  - Teamwork
  - Creativity

LANGUAGES

- Serbian (native)
- English (advanced)
